#### For Europe, the Iran nuclear deal is all about trade

Europe's advocacy for the JCPOA with President Trump is motivated by self-interest — trade with Iran that has rebounded tremendously since sanctions were lifted.

<http://thehill.com/opinion/international/386540-for-europe-the-iran-nuclear-deal-is-all-about-trade>

<http://thehill.com/opinion/international/386540-for-europe-the-iran-nuclear-deal-is-all-about-trade>

## For Europe, the Iran nuclear deal is all about trade

The leaders of Europe's two most powerful countries — France and Germany — visited the White House recently to try to convince President Trump to keep in place the Joint Comprehensive Plan of Action (JCPOA). Before and after their back-to-back trips, President Emmanuel Macron and Chancellor Angela Merkel bolstered their diplomatic efforts with several calls between the European leaders, including British Prime Minister Theresa May. Trump, who has referred to the Iran nuclear deal as "insane," will announce his decision Tuesday whether to terminate the agreement.

In many respects, the advocacy by Macron and Merkel mirrors the desperation of the Iranian regime — threatening, cajoling, pleading — for the United States to remain in the agreement.

This begs the question of why France and Germany are eager to preserve the deal. Are they peaceniks who care about nuclear non-proliferation and desire world peace? No, their support and that of the European Union for the JCPOA is motivated primarily by rational self-interest. It translates into dollars: valuable trade with Iran. The European Union was Iran's largest trade partner before the imposition of sanctions and clearly has an interest in recovering that position.

Trust must be earned.  
Trust is not blind, nor is truth.  
We fight every sigle day on behalf of you, the people who put us here.  
We knew this day would come.  
We will never forget.  
Do not glorify us.  
We are merely the vehicle.  
You are what matters.  
You are hope.  
You are love.  
You are peace.  
Stay united.  
Stay together.  
Stay strong.  
This is bigger than any one person or entity.  
You are fighting for truth - collectively.  
Will of the people.  
Trust in yourself.  
The choice will always be yours.  
God bless you all.  
Where we go one, we go ALL.

31) [#Qanon](#) posted about the difficult position POTUS put Europe in by leaving the Iran deal.  
If EU withdraws from it, Iran blows the whistle on bribes & kickbacks.  
If the EU remains in the deal, the US hits them with sanctions and could blow the whistle as well.  
A pickle indeed.

“A group representing German trade interests said the US decision to withdraw from the deal will hit German companies and urged the EU to protect their interests. Trade between Germany and Iran reached 3.4 billion euros (\$4 billion) last year, according to BGA, another foreign trade association.”  
What about Total S.A.?  
Total S.A. is a French multinational integrated oil and gas company and one of the seven "Supermajor" oil companies in the world.

**MICHELLE BACHMANN**  
 Congress of the United States  
 House of Representatives  
 Washington, DC 20515-2206

July 13, 2012

The Honorable Keith Ellison  
 1027 Longworth House Office Building  
 United States House of Representatives  
 Washington D.C., 20515

Dear Representative Ellison:

Thank you for your letter dated July 12, 2012. I am responding to the concerns your letter outlined as well as clarifying a few points that were misrepresented.

As you know, on June 13, 2012, Members of the House Permanent Select Committee on Intelligence, myself included, and the House Judiciary Committee, sent letters to the Inspectors General of the Department of Defense, Department of State, Department of Justice, Department of Homeland Security, and the Office of the Director of National Intelligence. The purpose of these letters was to request a multi-department investigation into potential Muslim Brotherhood infiltration into the United States Government.

We find this is not only necessary, but beyond timely, considering that departments and agencies of the U.S. Government (including but not limited to, those departments to which these Inspector General letters were sent) have in the past and continue to be advised by organizations and individuals that the U.S. Government itself has identified in federal court as fronts for the international Muslim Brotherhood. That such a widespread assessment has not been performed is troubling and is the basis for genuine concern given the stark contrast between what the U.S. Government says about these Muslim Brotherhood front groups and their continued association with these groups.

I do note that the facts we presented in the Inspector General request letters are based on information presented by U.S. Government officials in court documents, court evidence, correspondence and briefings with Congress and public statements, in addition to known media reporting. These letters were far from safe-sourced as you maintain in your letter.

While I can't speak on behalf of the other signatories of these letters, nor am I able to get into the private discussions and documentation received by the various House committees

## KASUMI

From Wikipedia, the free encyclopedia

**KASUMI** is a **block cipher** used in **UMTS**, **GSM**, and **GPRS** mobile communications systems. In UMTS, KASUMI is used in the **confidentiality** (*f8*) and **integrity algorithms** (*f9*) with names UEA1 and UIA1, respectively.<sup>[1]</sup> In GSM, KASUMI is used in the **A5/3** key stream generator and in GPRS in the **GEA3** key stream generator.

KASUMI was designed for **3GPP** to be used in UMTS security system by the **Security Algorithms Group of Experts** (SAGE), a part of the European standards body **ETSI**.<sup>[2]</sup> Because of schedule pressures in 3GPP standardization, instead of developing a new cipher, SAGE agreed with 3GPP technical specification group (TSG) for system aspects of 3G security (SA3) to base the development on an existing algorithm that had already undergone some evaluation.<sup>[2]</sup> They chose the cipher algorithm **MISTY1** developed<sup>[3]</sup> and patented<sup>[4]</sup> by **Mitsubishi Electric Corporation**. The original algorithm was slightly modified for easier hardware implementation and to meet other requirements set for 3G mobile communications security.
