Identifying Defensive Fronts

Every time we line up against our opponents we will be able to identify their defensive front structure immediately. Due to the WIDE alignments of our receivers, and the fast pace that our Burrell Bucs offense operates at, the defense can only line up in the following fronts unless one of our receivers is uncovered or they are in a blitz shell with 7 in the box. We must stay true to attacking uncovered receivers in order for us to avoid seeing "Mystery" defensive designs. Knowing and being able to identify each front the defense presents itself in is crucial for us to execute our proper play design. If you study the chart at the end of this chapter it will reveal all possible front/ and coverage combinations by formation for our offensive system here at Burrell.
