Using the product is simple and only requires a few steps. Anyone can do this, follow these instructions:

Fill the bottle with disinfectant diluted in water

Turn on the product

When green button turns on it's ready to work

## Benefits of Electrostatic Spraying Indoors

A basic understanding of electrostatic spraying is the process of spraying an electrostatically charged mist onto surfaces and objects. The spray contains charged particles that stick to surfaces and objects. While sticking they cling to and completely coat the surface.

Spraying on surfaces only requires a minute to cover an area while it kills 99.99% of all pathogens. The great part about using the SterilizekPro wireless disinfectant sprayer is it is touchless and uses a specialized solution combined with air and atomized by an electrode inside the sprayer.

Compare the SterilizekPro with one of the **best selling disinfectant mist guns on Amazon, the Atomizer**. This product has over 2,500 customer reviews and 74% of customers have rated the product 5 stars. [Click to read reviews!!](#)

## Safely Clean Surfaces

SterilizekPro Electrostatic sprayers are ten times more efficient to cleaning and killing bacteria than traditional cleaning methods. No area is out of reach to an electrostatic sprayer and is beneficial at cleaning all types of spaces including:

Gyms

Offices

Schools

Restaurants

Kitchens  
Food processing plants  
Assisted living facilities  
Hotels  
Medical facilities  
Home
