pretty sure the post by @q with Australia was signaling that Taiwan and Australia are next, because they have bio-weapons labs. Taiwan has two and just upgraded. Australia has four. Apparently there are 400 labs that are funded by DOD money.

2 years ago we were drilling our own oil for \$27 a barrel.
Thanks to Dumb Ass we're now paying \$105 a barrel to
Russia.

Pure insanity - failure by design...

Call Kenny Rogers, because you are in the danger zone

Did Q mean Kenny Loggins? (Loggins is the artist who did "Danger Zone" from the *Top Gun* film).

Why is the time stamp dated 1-3-2022 and what video editing software is that? Premier? After effects?

Not vouching for its authenticity, but that's the international date format, March 1st, a Tuesday (as January 3rd was a Monday)

KSH
FIGHT WITH KASH

The Ukrainians have shocked the world, and no one more so than Putin himself with their courageous resistance efforts. And they've basically done it alone. America's Commander in Chief is too busy quietly napping in Delaware and removing mask mandates so more people will go to his SOTU address before congress tonight. On a more serious note, as Putin escalates his war posture with talks of nuclear armaments, the Ukraine is left to go at it alone because America's national security prowess has been reduced to zero under Biden. Good thing he's giving the world a speech tonight, which the main stream media will lap up and applaud him for. I don't think the hundreds murdered in Ukraine will care but the media will not cover Biden's failure.
