# SKY GARDENS

## CONSTRUCTION UPDATE

September 2019

### WORKS PROGRESSED

In the latest Sky Gardens construction update, progress has been made across multiple areas of construction throughout the development.

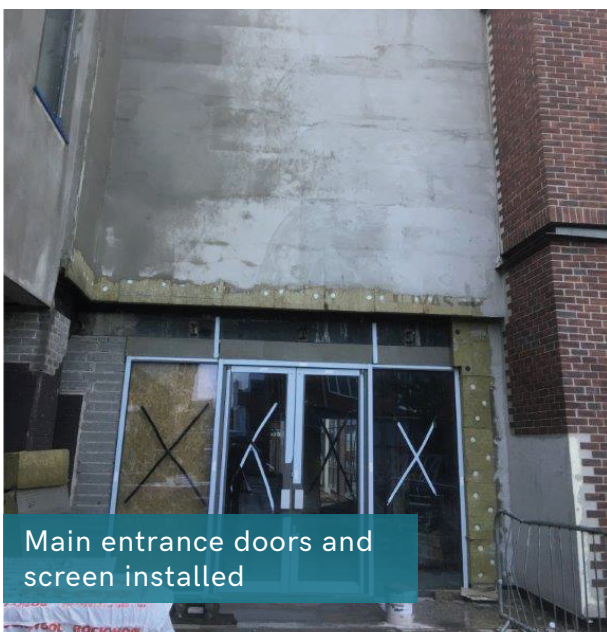

The installation of the windows to the rear building has now been completed and insulation to the façade is nearing completion.

Demolition of the safe room near to the rear block is also complete, as well as the structural alterations made to the brick and blockwork walls.

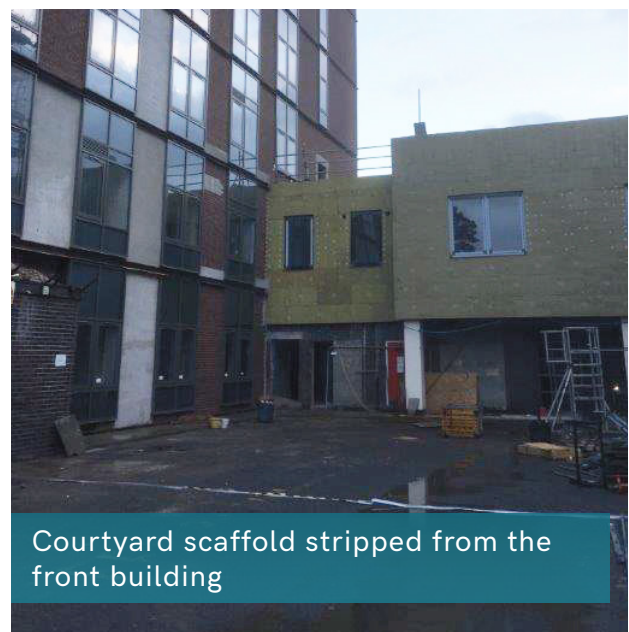

Scaffold has been erected to the rear block to allow the existing plant room to receive cladding. The steelwork vent supports have been installed for the smoke vent and floor apertures have been infilled where redundant.

Main entrance doors and screen are installed.

Also during this time, structural steel framing has been installed and progress has been made to the cement particle boards to the under-croft areas of the development.

Main entrance doors and screen installed

Courtyard scaffold stripped from the front building
