So do memes.

Why?

Jack & Zuck use AI to detect ideologies that need to be censored

Memes convey ideologies in a way that can't be detected by artificial intelligence.

Memes confound censors.

Understand one simple fact - the US is connected to the rest of the world.

Knowing that, understand, by default, if certain intel is released it would cause a WW/mass suffering.

We share the idea of open source but value life and must make decisions base decisions on outcomes and containability.

10) #Qanon knew there would be concern that last night's military action would be taken as a sign of a protracted war in Syria. Not a good look, especially since there's debate about who used chemical weapons.

11) On the 7th, #Qanon posted this.

The use of bombs (B-17) and missiles (sparrow red) had been authorized, but they would not be LAUNCHED unless irrefutable proof emerged that Assad had used chemical weapons on his own people.

12) #Qanon

Let's decode B19-2

B19-2 = B 17

I believe it's simply a reference to bombers.

Although B-1 bombers were used in last night's offensive, Q chose the B-17 as the reference point.

Boeing B-17 Flying Fortress

From Wikipedia, the free encyclopedia

"B-17" redirects here. For other uses, see B17 (disambiguation).
"Flying Fortress" redirects here. For the 1942 film, see *Flying Fortress* (film).

The **Boeing B-17 Flying Fortress** is a four-engine heavy bomber developed in the 1930s for the United States Army Air Corps (USAAC). Competing against Douglas and Martin for a contract to build 200 bombers, the Boeing entry (prototype Model 299/XB-17) outperformed both competitors and exceeded the air corps' performance specifications. Although Boeing lost the contract (to the Douglas B-18 Bolo) because the prototype crashed, the air corps ordered 13 more B-17s for further evaluation. From its introduction in 1938, the B-17 Flying Fortress evolved through numerous design advances,^{[6][7]} becoming the third-most produced bomber of all time, behind the B-24 and the multirole Ju 88.

The B-17 was primarily employed by the United States Army Air Forces (USAAF) in the daylight strategic bombing campaign of World War II against German industrial and military targets. The United States Eighth Air Force, based at many airfields in central and southern England, and the Fifteenth Air Force, based in Italy, complemented the RAF Bomber Command's nighttime area bombing in the Combined Bomber Offensive to help secure air superiority over the cities, factories and battlefields of Western Europe in preparation for the invasion of France in 1944.^[8] The B-17 also participated to a lesser extent in the War in the Pacific, early in World War II, where it conducted raids against Japanese shipping and airfields.^[9]

From its prewar inception, the USAAC (by June 1941, the USAAF) promoted the aircraft as a strategic weapon; it was a relatively fast, high-flying, long-range bomber with heavy defensive armament at the expense of bombload. It developed a reputation for toughness based upon stories and photos of badly damaged B-17s safely returning to

Let's decode Sparrow Red

The sparrow is an anti-aircraft & anti-ship missile

While tomahawks & standoff bombs were used in last night's offensive, for some reason Q chose the term "sparrow" to refer to missiles.

SPARROW

THE STANDARD FOR MANY WORLDWIDE SYSTEMS

The Sparrow™ Missile is a medium-range, all-weather, all-aspect, semi-active guided missile used in multiple roles by multiple services. In its air-to-air role, the missile is used on fighter aircraft of the U.S. Navy, Air Force and allied countries, including the F-4, F-15, F-16 and F/A-18. The surface-to-air version, the SeaSparrow, is used for shipboard point defense on more than 150 ships of various classes for the U.S. and numerous other countries.

The AIM/RIM-7P is the most recent model of the Sparrow family of missile systems, which began initial deployment in 1956 and has become the standard upon which many worldwide systems are based. Current Sparrow production includes only upgrades of older missiles to the 7P configuration. The 7P model features performance improvements providing look-down, shoot-down in heavy clutter environments and much lower altitude engagement. Additionally, it is more time immune to the ever challenging countermeasures threat.

14) Another possible interpretation of [#Qanon](#)'s reference to Sparrow Red.

Red Sparrow

From Wikipedia, the free encyclopedia

Red Sparrow is a 2018 American spy thriller film directed by Francis Lawrence and written by Justin Haythe, based on the 2013 novel of the same name by Jason Matthews. The film stars Jennifer Lawrence, Joel Edgerton, Matthias Schoenaerts, Charlotte Rampling, Mary-Louise Parker, and Jeremy Irons. It tells the story of a Russian intelligence officer who is sent to make contact with a CIA agent in the hope of discovering the identity of a mole.

Red Sparrow premiered at Newseum in Washington, D.C. on February 15, 2018, and was released in the United States on March 2, 2018.^[3] The film has grossed \$139 million worldwide and received mixed reviews from critics, who describe it as having "more style than substance," and criticized the film's length and over-reliance on graphic violence and sex, while praising Jennifer Lawrence's performance.^{[4][5]}

16) If you believe the use of chemicals in Syria was a false flag, the next question is:
How good is your intel?

The FF videos and reports we've all seen only show a small part of the picture.

The Defense Department has better intel than any of us.

[#Qanon](#)

17) The decision to greenlight the air strikes was not made quickly. Trump waited until he had all the data he needed. The wait gave Syria, Iran and Russia time to remove personnel and assets from the area if they wanted to. They took advantage of it to minimize loss of life.

18) [#Qanon](#) said they had good intel on which they based their decision.

Everything possible was done to minimize casualties.

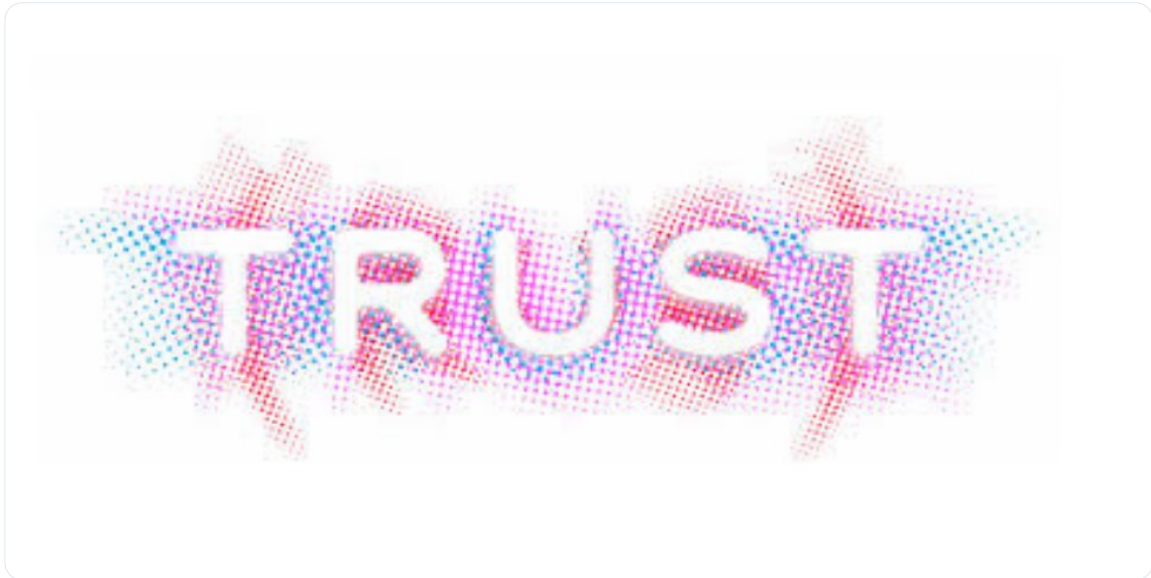

The President and Secretary Mattis confirmed they do not anticipate a long engagement.

Trump still plans to remove our troops from Syria.

19) POTUS doesn't need us to KNOW the details of the plan.

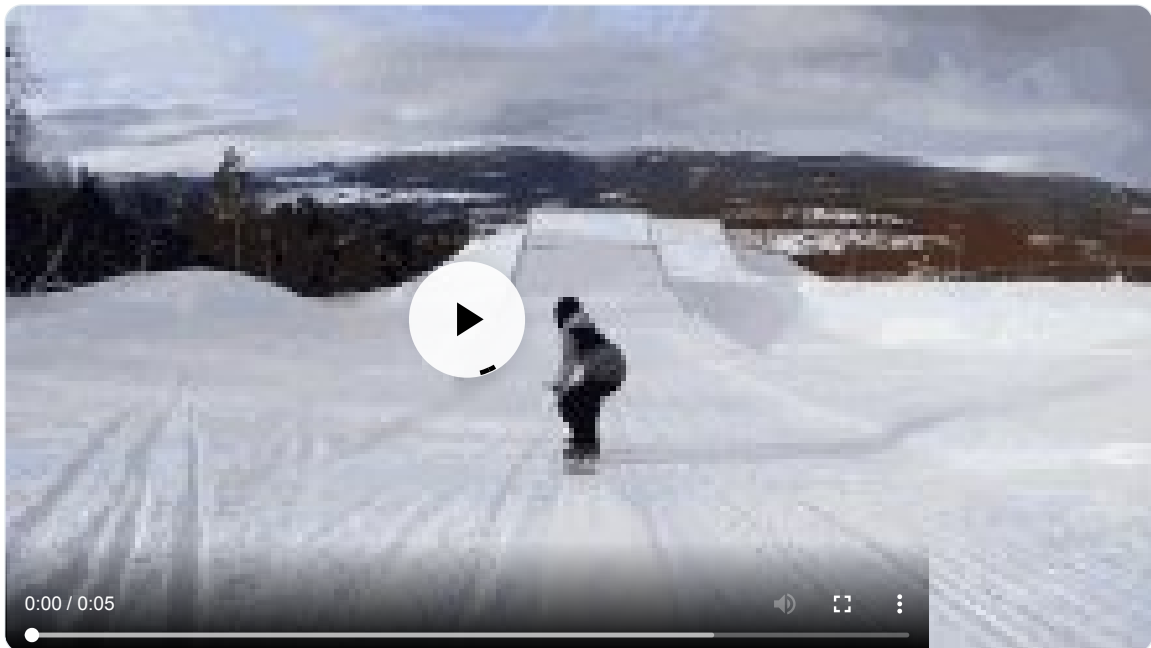

He needs us to TRUST that he has a plan and that he has our best interest at heart.

It's easy to trust the plan when things go the way we expect.
It's harder when things don't look like we think they should,
