Liverpool Central North

Construction Update

February 2017

Following the plot clearance in November, the construction team have been working hard (including on Boxing Day) to dig down to foundation levels of all houses.

Since the short Christmas & New Year break, we are delighted with the speed of progress, and all houses have had piling completed, foundations installed and some houses have even got the first course of brickwork now in place.

Therefore, the build is currently running to schedule.

Regular updates will be sent out at each stage of construction from foundations through to completion of the building.
