1) This is my [#Qanon](#) thread for Q posts from March 28 to the present.

Q posts can be found here:

qanonposts.com

qanon.pub

My theme for this series: Who is Q?

<https://pbs.twimg.com/media/DZdQPW-VwAAWQmY.jpg>

2) After days of debate on social media about the identity and validity of [#Qanon](#), I think it's time to let the cat out of the bag.

Dodging questions about Q's identity is ignoring the elephant in the room.

SHEDDING LIGHT ON YOU

<https://pbs.twimg.com/media/DZdTOCKVAAAI2Bf.jpg>

3) I believe [#Qanon](#) has taken advantage of recent debates and has (intentionally) given us enough information to identify him if we want to. My dream this morning seemed to confirm that it's time to share what I believe to be true about Q's identity.

4) Full disclosure:

I do not know with certainty who [#Qanon](#) is.

I do have suspicions about who Q is and a few dreams that seem to confirm my suspicions.

I will not identify the person I believe to be Q in this thread.

I will provide evidence you can use to identify Q on your own

5) Let's save the discussion of [#Qanon](#)'s identity for the end of the thread.

Yesterday morning, Q posted a long stringer that I've broken up into sections for easier viewing.

Here's part 1

Trump cut the strings to the CIA which facilitated a face to face (F2F) meeting between Kim Jong-Un, Trump and President Xi of China. The talks will result in the unification of the Korean peninsula and denuclearization of North Korea.

8) Who is Sergey Brin?

A Russian born computer whiz who pioneered computer data mining. His research led to the creation of Google—a completely new type of search engine based on backlinks to websites.

Sergey Brin

From Wikipedia, the free encyclopedia

This name uses Eastern Slavic naming customs; the patronymic is Mikhaylovich and the family name is Brin.

After graduation, he enrolled in [Stanford University](#) to acquire a PhD in computer science. There he met Page, with whom he later became friends. They crammed their dormitory room with inexpensive computers and applied Brin's [data mining](#) system to build a [web search engine](#). The program became popular at Stanford, and they suspended their PhD studies to start up Google in a rented garage.^[citation needed]

[The Economist](#) referred to Brin as an "[Enlightenment Man](#)", and as someone who believes that "knowledge is always good, and certainly always better than ignorance", a philosophy that is summed up by

What if the government backed a private company's efforts to obtain information on citizens without a warrant?

The Fourth Amendment originally enforced the notion that "each man's home is his castle", secure from **unreasonable searches and seizures** of property by the government. It protects against arbitrary **arrests**, and is the basis of the law regarding **search warrants, stop-and-frisk, safety inspections, wiretaps, and other forms of surveillance**, as well as being central to many other criminal law topics and to **privacy law**.

THE HILL

President Trump's new national security adviser is reportedly planning major staffing changes at the National Security Council.

Sources close to the situation told Foreign Policy that John Bolton is preparing to 'clean house' and remove nearly all of the political appointees brought in by his predecessor.

"Bolton can and will 'clean house'," one former White House official told Foreign Policy.

Another former official said any National Security Council officials appointed under former President Obama "should start packing their shit."

Foreign Policy reported that Bolton is planning to remove dozens of current officials, with a focus on those who have been "disloyal" to the president.

Bolton is the newest high-level addition to the Trump administration. The president announced late Thursday via tweet that Bolton would be replacing H.R. McMaster, making him Trump's third national security adviser in just 14 months.

ITfag here. Among other things, keep servers up for a living.

Those yelling "Q is a LARP because CM said he logged in from the same IP/device when Q claimed /GA/ was comped" have no fucking idea how the internet works and what is device hopping/tunneling.

First and foremost, we KNOW FOR A FACT that Q uses tunneled/hopped connections through several devices. Multiple times he was doing SEC_TESTS and device tests when clowns were attacking his capability.

If they succeeded, they took over the LAST DEVICE IN THE CHAIN THAT WAS VISIBLE FROM THE CLEARNET. Meaning: the endpoint, the route that actually connects to 8ch. This makes it possible to install a sniffer and look further up into the chain, and MOST IMPORTANTLY - to get a request logger to get Q's password for his trip. This is why Q's trip changed and this is why /GA/ was no longer to be trusted - because took over one of his endpoints, sniffed for a password and made changes to /GA/ that made /GA/ unsafe to use, since board owners are locked to their trips.

tl;dr eat shit AIM and Fake Q, you don't know fucking anything about the internet.
