

PART SIX

Review

Chart the game live, grade the film, and turn it into next week's plan.

6.1 Sideline Ops — live charting in three colors

<https://winlabs.com/football/sideline-ops> is high-speed play charting with three result buttons.

Setup

37. Pull up the call sheet on tablet 1.
38. Open Sideline Ops on tablet 2 (or laptop in the box).
39. The current play, down, distance, and field position are pre-filled from the prior play.

Chart a play

40. Tap the play that was called (or type the wrist code).
41. Hit the result button: Green = successful, Blue = neutral, Red = negative.
42. The chart auto-advances down/distance.

Live exports

Press box can pull a live PDF of charted plays at any halftime. Coordinator headset view shows real-time tendency drift.

► TRY IT IN WINLABS

Open Sideline Ops

→ <https://winlabs.com/football/sideline-ops>

★ PRO TIP

Have a GA shadow-chart from the press box. The double-entry catches typos and gives you a second-source backup if a tablet dies.

⚠ COMMON PITFALL

Trying to chart from your call-sheet tablet. The constant tab-switching loses plays.

✓ DRILL / EXERCISE

Charting drill

1. Open Sideline Ops in practice.
2. Chart 10 practice reps in under 90 seconds.
3. Confirm down/distance advanced cleanly each time.

6.2 Player Grading on a 1-4 scale

<https://winlabs.com/football/grading> grades every snap on a 1–4 scale across four dimensions.

The rubric

Score	Meaning
1	Loaf / wrong / no effort
2	Below standard
3	At standard
4	Plus play

Four dimensions per snap:

- Assignment — did they know what to do?
- Technique — did they do it right?
- Effort — did they finish?
- Execution — did the result match the intent?

Workflow

The grading panel surfaces clip-by-clip; tap the score for each dimension. A post-game accuracy score rolls up assignment + execution into a coachable team grade.

Open Grading

→ <https://winlabs.com/football/grading>

★ PRO TIP

Grade Sunday morning, share Monday. Players need to see the grade before Tuesday's practice.

⚠ COMMON PITFALL

Grading Effort generously to keep morale up. You will lose discipline by week six. Grade Effort the same way every week.

✓ DRILL / EXERCISE

Grade one position group

1. Open Grading.
2. Grade one position group only (e.g. WRs).
3. Spend no more than 25 minutes. Save. Share.

6.3 Self-Scout and Concept Efficiency

<https://winlabs.com/football/self-scout> is the merged 4-tab hub for seeing what you actually call and how each concept performs.

The four tabs

- 43. Season Trends — your tendencies as the opponent would see them.
- 44. Concept Efficiency — yards/play and success rate by concept.
- 45. Personnel — usage and efficiency by personnel grouping.
- 46. Situational — your performance in critical down/distance buckets.

► TRY IT IN WINLABS

Open Self-Scout

→ <https://winlabs.com/football/self-scout>

★ PRO TIP

If any tendency is above 70%, an opposing coordinator will key on it. Flag and counter-call.

⚠ COMMON PITFALL

Looking only at Season Trends and ignoring Concept Efficiency.

✓ DRILL / EXERCISE

Sunday tendency sweep

1. Open Self-Scout → Season Trends.
2. List every tendency >70%.
3. For each, add one counter call to next week's Game Plan.

6.4 Analytics Intelligence Suite (WPA)

The Analytics Intelligence Suite provides predictive analytics built for football:

- Win Probability Added (WPA) per call.
- Success rate vs. benchmark percentages for your level.
- Drive efficiency, finishing rate, explosive play rate.

How to use it

- After each game, review the WPA timeline — which calls actually moved the needle?
- Use benchmark comparisons to set realistic targets for next week's plan.
- Tie underperforming concepts back to Concept Efficiency.

► TRY IT IN WINLABS

Open Analytics

→ <https://winlabs.com/football/analytics>

★ PRO TIP

Find your three highest-WPA calls each game. Tag them must-call in next week's Game Plan.

⚠ COMMON PITFALL

Chasing single-game WPA outliers. A 50-yard TD from a busted coverage skews everything. Trust 4-game rolling averages.

✓ DRILL / EXERCISE

Top-3 WPA harvest

1. Open Analytics after this week's game.
2. Find top 3 WPA calls.
3. Add must-call tag in next week's Game Plan.
