How Do I Use Sleep Guard Plus?

As per the Sleep Guard Plus Ingredients Label, One capsule every evening before getting into bed is all it takes for Sleep Guard Plus to start working.

How Does Sleep Guard Plus Work?

Modern research has led to an understanding that sleeping can be due to an imbalance in the gut microbiota that is caused by food habits.

Our gut microbiota takes one attack after another, which reduces their number and disrupts our serotonin levels. Serotonin production, which is 95 percent of which occurs in our gut and not in our brains, is crucial for the sleep-wake cycle. If it isn't able to reach our nervous system, the brain is unable to rest and relax.

Sleep Guard plus was developed with one objective in mind: safeguard the gut's biodiversity from external invaders, improve our immunity as well as our nervous system, and increase the production of serotonin and add into our bodies amino acids and minerals that combat the root causes of sleep deprivation.
