

Selling Your Home

INTERNET MARKETING

Once your property goes live in the MLS, we will advertise on various third-party real estate search engines (such as Zillow, Trulia, Redfin, etc....). This process takes time so please be patient. We have access to some of the reports that show online activity for your property.

Note that Zillow, Realtor.com and several other sites are “marketing” sites. They are not real estate brokers or appraisers. These are marketing/advertising website’s, and we don’t control how or what they advertise.
