Lieutenant general (United States)

In the **United States Armed Forces**, a **lieutenant general** is a **three-star general officer** in the **United States Army**, **Marine Corps**, and **Air Force**.

A lieutenant general ranks above a **major general** ^[Note 1] and below a **general**. The **pay grade** of lieutenant general is O-9. It is equivalent to the rank of **vice admiral** in the other United States **uniformed services** which use **naval ranks**. It is abbreviated as **LTG** in the Army, **LtGen** in the Marine Corps, and **Lt Gen** in the Air Force.

9) Today, Q reminded us of what he said last December. Some of the exculpatory evidence was being used to indict those who illegally spied on General Flynn.

10) Q provided the chain of the command structure for several highly important FBI investigations, including the Trump-Russia investigation, the Hillary Clinton email investigation, and the investigation of the DNC server "hack."

11) If the top-level employees of the FBI, who were involved in these investigations were fired, what does it say about the integrity of the investigations?

910. KNOWINGLY AND WILLFULLY

The prohibition of 18 U.S.C. § 1001 requires that the false statement, concealment or cover up be "knowingly and willfully" done, which means that "The statement must have been made with an intent to deceive, a design to induce belief in the falsity or to mislead, but § 1001 does not require an intent to defraud -- that is, the intent to deprive someone of something by means of deceit." *United States v. Lichenstein*, 610 F.2d 1272, 1276-77 (5th Cir.), cert. denied, 447 U.S. 907 (1980). The government may prove that a false statement was made "knowingly and willfully" by offering evidence that defendants acted deliberately and with knowledge that the representation was false. See *United States v. Hopkins*, 916 F.2d 207, 214 (5th Cir. 1990). The jury may conclude from a plan of elaborate lies and half-truths that defendants deliberately conveyed information they knew to be false to the government. *Id.* at 214-15.

As used in the statute, the term "knowingly" requires only that the defendant acted with knowledge of the falsity. See *United States v. Lange*, 528 F.2d 1280, 1287-89 (5th Cir. 1976). As in other situations, to commit an act "knowingly" is to do so with knowledge or awareness of the facts or situation, and not because of mistake, accident or some other innocent reason. See *Fifth Circuit Pattern Jury Instructions*, § 1.35 (1990). Knowledge of the criminal statute governing the conduct is not required.

The false statement need not be made with an intent to defraud if there is an intent to mislead or to induce belief in its falsity. Reckless disregard of whether a statement is true, or a conscious effort to avoid learning the truth, can be construed as acting "knowingly." *United States v. Evans*, 559 F.2d 244, 246 (5th Cir. 1977), cert. denied, 434 U.S. 1015 (1978).

A defendant is not relieved of the consequences of a material misrepresentation by lack of knowledge when the means of ascertaining truthfulness are available. In appropriate circumstances, the government may establish the defendant's knowledge of falsity by proving that the defendant either knew the statement was false or acted with a conscious purpose to avoid learning the truth. See *United States v. West*, 666 F.2d 16, 19 (2d Cir. 1981); *Lange*, 528 F.2d at 1288; *United States v.*

My Campaign for President was conclusively spied on. Nothing like this has ever happened in American Politics. A really bad situation. TREASON means long jail sentences, and this was TREASON!

>Irregular warfare is far more varied than conventional conflict; hence the importance of an intellectual framework that is coherent enough to provide guidance, and flexible enough to adapt to circumstances.
>American counterinsurgency practice rests on a number of assumptions: that the decisive effort is rarely military (although security is the essential prerequisite for success); that our efforts must be directed to the creation of local and national governmental structures that will serve their populations, and, over time, replace the efforts of foreign partners; that superior knowledge, and in particular, understanding of the 'human terrain' is essential; and that we must have the patience to persevere in what will necessarily prove long struggles.
>Insurgency, however, can and will flourish in the modern environment. The strains created by globalization, by the collapse of weak state structures, by demographic, environmental, and economic pressures, by the ease of cooperation among insurgent groups and criminals, and by the appearance of destructive radical ideologies, all augur a period in which free and moderate governance is at risk.

[Insurgency is the organized use of subversion and violence to seize, nullify or challenge political control of a region. As such, it is primarily a political struggle, in which both sides use armed force to create space for their political, economic and influence activities to be effective. Insurgency is not always conducted by a single group with a centralized, military-style command structure, but may involve a complex matrix of different actors with various aims, loosely connected in dynamic and non-hierarchical networks. To be successful, insurgencies require charismatic leadership, supporters, recruits, supplies, safe havens and funding (often from illicit activities). They only need the active support of a few enabling individuals, but the passive acquiescence of a large proportion of the contested population will give a higher probability of success. This is best achieved when the political cause of the insurgency has strong appeal, manipulating religious, tribal or local identity to exploit common societal grievances or needs. Insurgents seek to gain control of populations through a combination of persuasion, subversion and coercion while using guerrilla tactics to offset the strengths of government security forces. Their intent is usually to protract the struggle, exhaust the government and win sufficient popular support to force capitulation or political accommodation. Consequently, insurgencies evolve through a series of stages, though the progression and outcome will be different in almost every case.]

67 Q seems to be highlighting how insurgency tactics are being used by the establishment to control the population in the hope of removing of POTUS from office.

70) The document provides some of the scientific evidence showing the effectiveness of chloroquine and hydroxychloroquine in treating strains of coronavirus.

Executive Summary Interpretation of the Data In This Report

The HCQ-AZ combination, when started immediately after diagnosis, appears to be a safe and efficient treatment for COVID-19, with a mortality rate of 0.5% in elderly patients. It avoids worsening and clears virus persistence and contagious infectivity in most cases.

MJ Vincet, E. Bergon, S. Benjannet, BR Erickson, Pierre Rollin, T.G. Ksiazek, NG Seidah, ST Nichole. **Chloroquine is a potent inhibitor of SARS coronavirus infection and spread.** *Virology Journal*. (2005) 2: 69

Chloroquine has strong antiviral effects on SARS CoV infection of primate cells in tissue culture. **These inhibitory effects are observed when cells are treated with the drug either before or after exposure to the virus, suggesting both prophylactic preventative and treatment use.** The paper describes three mechanisms by which the drug might work and suggest it may have both a prophylactic and therapeutic role in Coronavirus infections.

LETTER TO THE EDITOR *Cell Research* **Remdesivir and chloroquine effectively inhibit the recently emerged novel coronavirus (2019-nCoV) in vitro.** *Cell Research* (2020) 0:1–3; <https://doi.org/10.1038/s41422-020-0282-0>

Tested Remdesivir and Chloroquine in addition to five other drugs were tested in tissue culture against a clinical sample of virus from a COVID-19 patient, **Remdesivir and Chloroquine are highly effective in the control of 2019-nCoV infection in vitro.** Since these compounds have been used in human patients with a safety track record and shown to be effective against various ailments, we suggest that they should be assessed in human patients suffering from the novel coronavirus disease.

Physicians work out treatment guidelines for coronavirus. *Korea Biomedical Review*

<http://www.koreabiomed.com/news/articleView.html?idxno=7428>

The Korean COVID-19 Central Clinical Task Force, held the sixth video conference and agreed on treatment principles for patients with COVID-19.

- **Young with mild symptoms without underlying conditions, doctors can observe them without antiviral treatment.**
- **If 10 days have passed since the onset of the illness and the symptoms are mild, physicians do not have to start an antiviral medication.**
- **If patients are old or have underlying conditions with serious symptoms, physicians should consider an antiviral treatment as soon as possible. lopinavir 400mg/ritonavir 100mg (Kaletra two tablets, twice a day) or chloroquine 500mg orally per day. Alternate is hydroxychloroquine 400mg orally per day.**

71) If evidence for the effectiveness of chloroquine derivatives for treating coronavirus was established long ago, why do politicians and the press insist these medications are "untested?"
