POETS PLACE CONSTRUCTION UPDATE

August 2019

POETS PLACE

CONSTRUCTION UPDATE

August 2019

The latest construction update for Poets Place details the commencement of pre contract appointments with a number of professional teams, including the architect, structural engineers and health and safety. Appointments have also begun with the construction design and management consultants and mechanical and electrical consultants.

ARCHITECT

The architect has produced the proposed drawings and plans, coordinated with the structural, mechanical and electrical design requirements

STRUCTURAL

Structural works are being planned out, with detailed working drawings created.

MECHANICAL AND ELECTRICAL

Mechanical and electrical teams have also delivered general arrangement drawings for every essential system to be implemented in the site.

OTHER PROGRESS

The order has been placed with contractors to install the hoardings to the perimeter of the site. The removal of trees and large shrubs will also commence which will require the temporary closure of the highway.

Site investigations are then to be carried out over the next two weeks. A topographical survey will also be undertaken.

Photos will be sent upon the commencement of the tree removal and installation of the hoardings to show the progress made at the development.
