3) Yesterday, Sarah Carter reported that, according to the DOJ, the "Woods file" for Carter page's FISA application "went missing" 2 years ago.

4) "Woods Procedures" are precautions taken by the FBI/DOJ to verify the accuracy and completeness of information contained in a FISA warrant.

5) In a recent review of 29 FISA applications, the DOJ Inspector General found errors in all 25 applications that contained a Woods file. The other four had missing Woods files and in three cases, it could not be determined if a Woods file ever existed.

6) Yesterday we learned that the FISA application on Carter Page had no Woods file, so one had to be created by Robert Mueller's team after the fact. It's unknown when it was first reported missing and unknown if one had been included with the original FISA application.

The original Woods file on former campaign advisor Carter Page went missing more than two years ago, and according to sources who spoke to SaraACarter.com, those documents had to be recreated by the FBI and former Special Counsel Robert Mueller's team in 2018 from the Foreign Intelligence Surveillance Application used by the bureau to obtain the warrant on Page. That FISA was used in part to investigate President Donald Trump's campaign and the now-debunked theory that it colluded with Russia during the 2016 election, according to several sources, with knowledge, who spoke to this reporter.

The woods file procedure, which was overseen by FBI Supervisory Special Agent Joe Pientka, and ultimately former FBI Deputy Assistant Director Peter Strzok, was used to verify the contents in the Foreign Intelligence Surveillance Act application that was used to obtain a warrant to spy on Page.

Moreover, during Pientka's numerous interviews with investigators from the DOJ's Inspector General's office, who likely have worked for both Michael Horowitz and Connecticut prosecutor John Durham – the fact that it was a recreated Wood's file was never disclosed.

In fact, it had been missing for an unknown period of time, possibly up to two years and officials did not become aware it had disappeared until last week during a closed-door Senate Intelligence Committee hearing.

The "7th floor" is a euphemism for the upper echelon of the FBI.

"Follow the logs."

8) When Q said in January of 2018, "The 7th floor is no more," it was a reference to the removal of corrupt members of the State Department, not the FBI's 7th floor.

Information systems log events.

If the Carter Page Woods file was created and then hidden, it would be logged.

Several people have access to those logs, including AG Bill Barr.

Section 6: Information Security	
6.1	Indicate all that apply.
X	As part of the system development, security engineering has been integrated into the system. Independent security code reviews were conducted during the course of development. In addition, Security Division conducted vulnerability scans using a set of industry standard tools to identify and isolate security vulnerabilities. In preparation for granting an Authority to Operate (ATO), Security Division conducted a formal independent security risk assessment. Technical and non-technical evaluation of the system was completed by the Security Division to verify that security controls are correctly implemented and effective. These risks were included in the C&A report presented to the Designated Accrediting Authority (DAA).
X	Appropriate security controls have been identified and implemented to protect against risks identified in security risk assessment. All major security vulnerabilities identified by the security risk assessment have been reviewed and resolved to ensure system secure operations. All other vulnerabilities have been addressed with mitigation plans to ensure that only an acceptable level of risk is taken by the FBI.
X	Monitoring, testing, or evaluation has been undertaken to safeguard the information and prevent its misuse. Specify: Throughout the development process, the SENTINEL test team continuously tested the code, including the data access controls. In addition, independent tests and reviews were conducted by a contractor Independent Verification and Validation team and the Security Division (Certification and Accreditation team (C&A). Audit logs will be provided to the Enterprise Security Operations Center (ESOC) on a daily basis for monitoring of potential system misuse.
X	The information is secured in accordance with FISMA requirements. Provide date of most recent Certification and Accreditation: The current Sentinel Authority to Operate expires on December 27, 2014.
X	Auditing procedures are in place to ensure compliance with security standards. Specify, including any auditing of role-based access and measures to prevent misuse of information: Local monitoring of audit logs occurs as part of routine SENTINEL operations, and events can be escalated for ESOC analysis. All Operating System, Database and GetPut logs are provided to the ESOC on a daily basis. The Enterprise Operations Center will perform network level monitoring. System audit logs are reviewed on a daily basis by the Security Administrator with auditor privileges. Audit logs can only be accessed by the Information Systems Security Officer and specific privileged users. Audit reports of specific events can be requested. General users cannot view, change, or delete the audit logs. The system will meet the requirements contained in the FBI certification and accreditation handbook, and relevant NIST information security standards and Special Publications. Users will directly access the SENTINEL application through their FBINET workstation. SENTINEL supports single-sign on. After logging into FBINET, an authorized user will launch the SENTINEL application by clicking on the desktop SENTINEL icon. An authorized user's FBINET (Active Directory) identifier will be passed to the SENTINEL application for authentication. The application will first verify that the FBINET user id
