Israel/Gaza	CPJ supported the @FPAIsPal in challenging Israel’s ban on international media access to Gaza in the Israeli Supreme Court in October 2024, and we condemn Israel’s recent decision to maintain this blanket ban based on broad, unfounded security claims. This is a serious violation of press freedom and appears designed to systematically shield events from scrutiny and prevent the gathering of critical evidence.
Israel/Gaza	.@collinsdyl, an American journalist who was wounded in an Israeli tank strike in Lebanon in October 2023, is pressing the U.S. government to investigate the incident as a targeted attack. “Five international organizations, including a UN body, have all concluded that Israel was responsible for the attack, and offered a preponderance of evidence showing just how identifiable the journalists were,” said CPJ’s Advocacy Director Amelia Evans, at a press conference last month. Israel/Gaza	Israel has barred international media from entering Gaza since October 2023, leaving Palestinian journalists and media workers to bear the burden of documenting what human rights groups and UN experts agree is a genocide. Foreign press has only been able to enter through infrequent military escorts that last a few hours, on carefully staged itineraries planned by the army. CPJ spoke to three journalists who were taken on escorted visits since the October 2025 ceasefire. Restricted tours fail to satisfy internationally recognized standards for press freedom and cannot satisfy Israel's obligations under international law to enable independent newsgathering. Journalists' experiences on these tours show consistent patterns of restricted movement, pre-publication review, staged visuals and curated interactions — including not being allowed to meet Palestinians. This makes it impossible to verify claims, document civilian conditions, or conduct independent interviews, leaving foreign coverage dependent on staged narratives. Palestinian reporters continue to carry the burden of bringing the world vital coverage from the region, under unimaginable, life-threatening conditions. More than 200 Palestinian journalists and media workers have been killed in Gaza since October 2023. CPJ has repeatedly urged Israel to lift its ban on unescorted media access. In October 2025, CPJ filed an amicus brief challenging Israel's ban in the Israeli Supreme Court. The Israeli government has requested repeated extensions to respond to the petition, prolonging the absence of international journalists from Gaza, while CPJ has urged the court to consider the significant public interest at stake.
