Commercial Dental Market Recovery Tracking – Update: Data Through Week Ending May 24

Overview

Throughout the COVID-19 Crisis, P&R Dental Strategies®, and our DentalMarketIQ® (DMIQ) division, will be marshaling our entire arsenal of dental data and analytical firepower, and deep dental domain expertise, to help all dental market stakeholders better understand what’s happening, what to consider, and to answer specific questions we’ve been asked by our clients and colleagues in the market. We plan to produce and share other Coronavirus Impact Insights analyses as the situation develops.

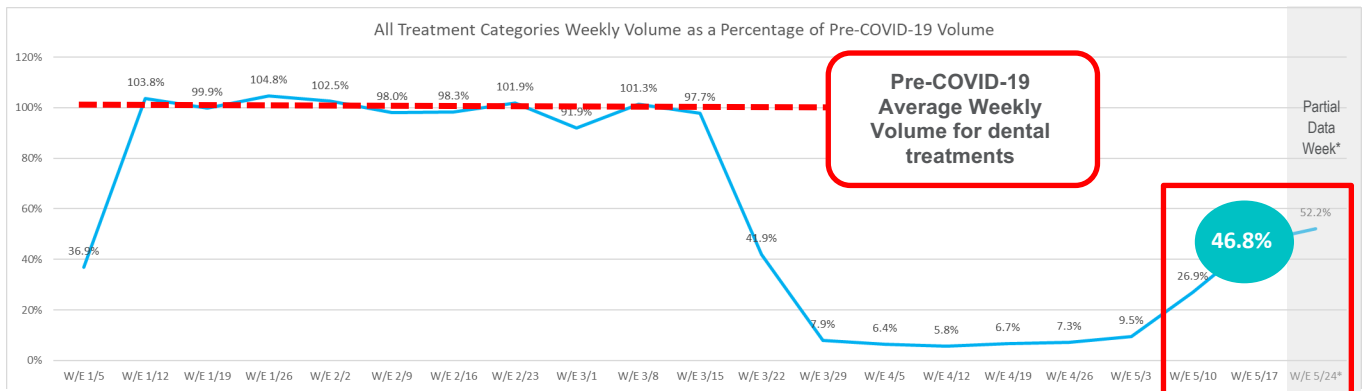

P&R and DMIQ’s data-driven insights are derived from our various data resources, including DentaBase®, our ever-expanding proprietary multi-payer database, which contains over 3.5 billion dental procedure records from 66 national and regional commercial dental insurance payers. DentaBase contains statistically significant utilization, financial and claim review data on over 190,000 US dentists covering 70+ million commercial insurance members and enables us to provide keen, actionable insights that are not available from other sources.

Question: As states begin to permit the re-opening of non-essential businesses, where are increases in dental treatments occurring?

As of today, 49 states have permitted dental practices to reopen for Non-Essential procedures.

During the week ending 5/17, national dental treatment volume increased to 47% of pre-COVID-19 volume.

The week ending 5/17 again showed a material increase in treatment volume with overall national dental treatment volume at 47% of the pre-COVID-19 average weekly treatment volume.

* All pre-COVID-19 weekly averages are based on weeks ending 1/5 through 3/15/2020. Data for week ending 5/24 is based on partial week and is included solely for early view.

OVERVIEW

Treatment volume increased in ALL procedure categories in the week ending 5/17.

Dental treatments continue to be dominated by procedures that are likely Urgent/Emergency* treatments.

*The classification of treatments as Urgent/Emergency or Non-Essential treatments is based on a review of procedures by CDT code by our Chief Dental Officer and clinical team. See Appendix for a list of procedures by classification.

Most Likely Urgent/Emergency Treatments		Possibly Urgent/Emergency Treatments	Not Likely/Not Generally Urgent/Emergency Treatment	
Definitely/Highly Likely Urgent/Emergency	Probably Urgent/Emergency	Possibly Urgent/Emergency	Unlikely Urgent/Emergency	Non-Essential

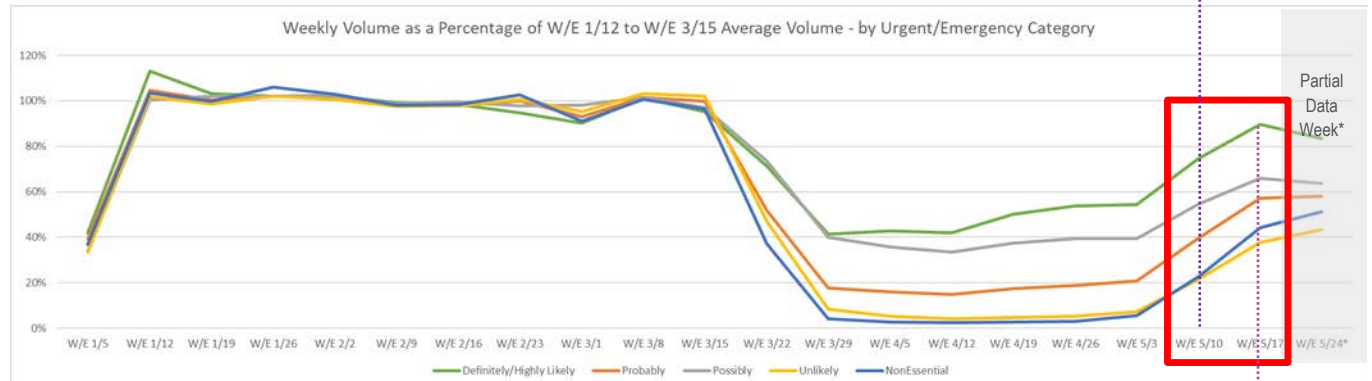

NATIONAL DISTRIBUTION OF DENTAL TREATMENTS BY URGENT/EMERGENCY CATEGORY

Notable Volume Increases Since April
In the week ending 5/10, we saw dramatic increases in treatments.

Overall treatment volumes in all categories combined was at **27%** of pre-COVID-19 weekly averages for the week ending 5/10.

Volume for the week ending 5/10:

- Non-Essential and Unlikely Urgent/Emergency treatments reached **23%** and **22%**, respectively, of the pre-COVID-19 treatment volume.
- Definitely/ Highly Likely, Probably, and Possibly Urgent/Emergency treatment categories continued to dominate the overall volume.

Another Impressive Increase in Week Ending 5/17
In the week ending 5/17, treatment volumes increased materially compared to the week ending 5/10.

Overall treatment volumes in all categories combined increased to **47%** of pre-COVID-19 weekly averages for the week ending 5/17.

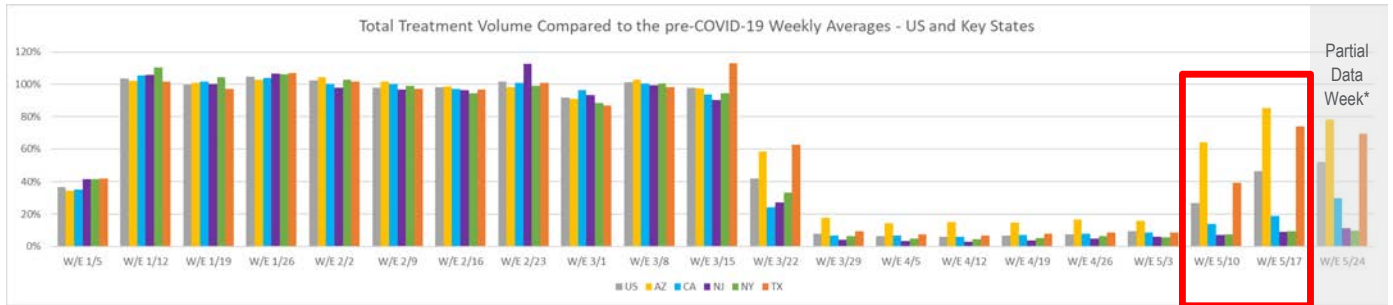

Volume for the week ending 5/17:

- Non-Essential and Unlikely Urgent/Emergency treatments continued their substantial volume increases, reaching **44%** and **38%**, respectively, of pre-COVID-19 levels.
- Definitely/Highly Likely, Probably & Possibly Urgent/Emergency treatments reached volumes ranging from **55%** to almost **90%** of pre-COVID-19 average volumes for those categories.

* All pre-COVID-19 weekly averages are based on weeks ending 1/5 through 3/15/2020. Data for week ending 5/24 is based on partial week and is included solely for early view.

DIFFERENCES BY STATE

The variations in state treatment volumes in the **week ending 5/17** are consistent with previous variations, as Non-Essential treatments resume in many states.

AVERAGE TREATMENT VOLUME BY URGENT/EMERGENCY CATEGORY

PRE-COVID-19 WEEKLY AVERAGE TREATMENT VOLUME – BASED ON W/E 1/5 TO W/E 3/15

Pre-COVID-19 Non-Essential treatments were consistent across the country.

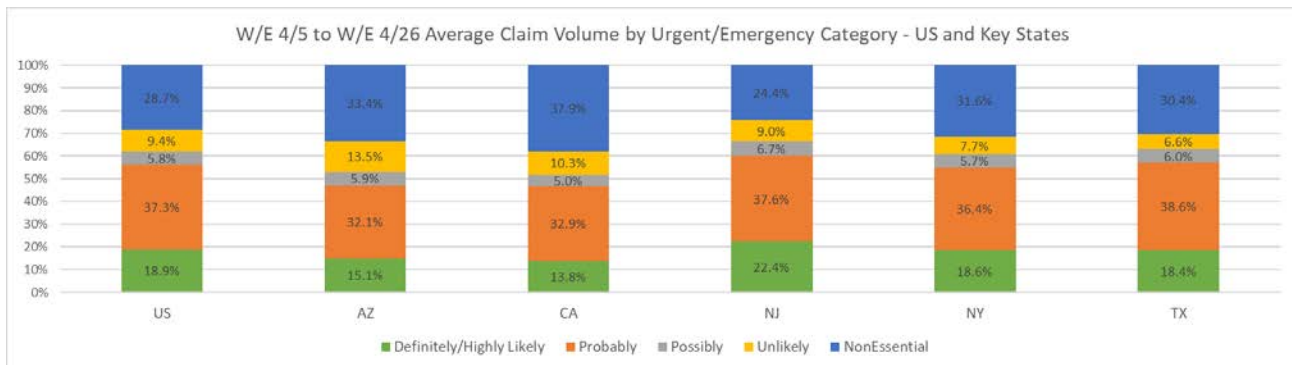

- Treatments classified as Non-Essential represent approximately 2/3 of all treatments.

W/E 4/5 to W/E 4/26 vs. W/E 5/3 to W/E 5/17

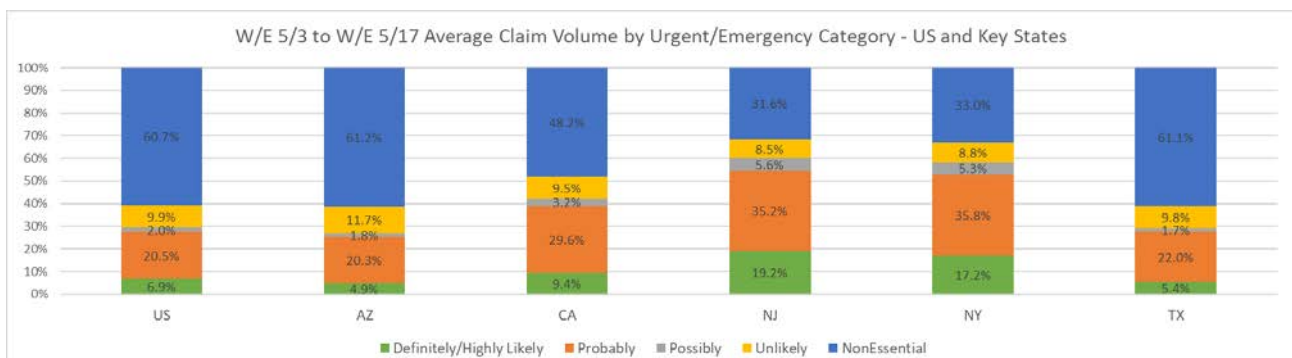

As the Stay-at-Home orders took effect in April, treatment volume distribution changed dramatically.

- Treatments that were *Definitely/Highly Likely* to have been an Urgent/Emergency treatment increased to approximately **20%** (from a pre-COVID-19 average of **3%** or less).
- Non-Essential* treatments generally dropped to one-third or less of the total treatment volume.

However, in May, *Non-Essential* treatments rebounded quickly.

- Non-Essential* treatments have increased nationally to over **60%** of total treatment volume — however, in a few key states like New Jersey and New York, *Non-Essential* treatments remain low.
- Definitely/Highly Likely* and *Probably Urgent/Emergency* treatments continue to be **25%** or more of the treatments observed nationally.

* All pre-COVID-19 weekly averages are based on weeks ending 1/5 through 3/15/2020. Data for week ending 5/24 is based on partial week and is included solely for early view.

ABOUT P&R DENTAL STRATEGIES®

P&R Dental Strategies is the premier dental insights company delivering customized, actionable business intelligence and objective dental quality measurement. The power of DentaBase, our national multi-payer claims database and our industry-leading team of dentists, consultants and statisticians makes P&R Dental Strategies the authority on dental quality and data analysis. Our flexible, cutting-edge technology platform provides an enterprise-level suite of quality measurement, claim review and utilization management, provider profiling, fraud and abuse prevention and network development solutions to customers seeking to contain costs and maximize efficiency across their businesses. We aim to recognize and promote continued innovation, improved quality of care and analytical thinking in the dental industry.

ABOUT DENTALMARKETIQ®

DentalMarketIQ is the leading provider of business intelligence and data for dental equipment and merchandise suppliers. Maintaining the most comprehensive dentist location and dental claims database in the country, DentaBase, DentalMarketIQ provides suppliers with a trusted, single source of truth on nearly all active U.S. dentists to guide suppliers to the highest-potential sales targets and support their future growth strategies. Through data and analytics, engagement and execution support and consulting services, we help dental suppliers acquire new customers, keep and grow existing customers, introduce new products and enter new markets. With these powerful data solutions and a team of dental market and analytics experts to help suppliers better understand their markets, DentalMarketIQ is the authority on dental industry trends, developments and business optimization solutions. DentalMarketIQ is a division of P&R Dental Strategies, LLC, the premier dental insights company.
