

Aceso System Consumer Instructions

BEFORE YOU START: Avoid Eye Contact and Keep Out of Reach of Children.

Use on fingernails and toenails only. Avoid Eye contact. Keep out of reach of children. **Step Two** is flammable-keep away from heat, sparks and flame.

File the nail plate as short as comfortable and thin the nail plate with a nail file.

Debrider:

- After soaking 3-5 minutes, (after bath or shower suggested). Pat Dry and then apply Debrider to exposed area under and around the nail to loosen, soften and remove dead tissue. Allow to soak a few minutes, then flush gently with clean water. Repeat every 2 days until clean and dry.
- Debrider aids in allowing new nail growth to grow out more quickly.

Step 1 and **Step 2** should be applied twice daily, if possible, but daily at a minimum. **Step 1** works best on a nail that has been exposed to water. For example, after a bath, shower or just a 3 - 5 minute soak in water. This allows **Step 1** to “draw” into and through the nail plate onto the nail bed tissue.

1. Apply one drop of **Step 1** to the surface of a damp nail after bathing or soaking. If the nail is lifted, allow product to gently seep under the nail.
2. Apply **Step 2** to the cuticle and surrounding skin and lightly massage. This will appear sticky until it dries in under 10 seconds.
3. As the nail grows out, file off or clip the affected free edge.

Continued Use: Continue to use the **ACESO SYSTEM** until the affected area appears normal. Everyone's level of symptoms are different. Weeks up to Months is normal.

Unfortunately, there are no “quick fixes” when it comes to Addressing these nail conditions. This is because a new toenail must grow to replace the old, damaged toenail. This time frame varies on how fast or slow your toenails grow and how severe the nail condition is.

Positive results from the ACESO System are wholly dependent on the Client's adherence to the use protocol.

The ACESO System is not a drug. It has not been reviewed or approved by the FDA to Diagnose, Prevent, Treat or Cure any nail conditions.
