1) This is my [#Qanon](#) thread for July 26, 2018

My theme: Something BIG is About to Drop

<https://pbs.twimg.com/media/DjCvYgMU4AALK82.jpg>

2) I'd like to begin with an older post by [#Qanon](#) that outlines his mission and our role.

Q asks questions to get us to think and research.
The first purpose is for us to discover the truth.

<https://pbs.twimg.com/media/DjD9iJoU4AAM7-7.jpg>

3) The second purpose of #Qanon's mission is to gather and assemble the information we find and then distribute it to people in our sphere of influence.

My role is to give you the information I've found. Your role is to help share it with people you know.

4) The President WANTS TRANSPARENCY

His purpose for allowing us access to #QAnon is to provide information we would never have access to.

In many cases, we're given clues that help us discover the truth for ourselves.

<https://pbs.twimg.com/media/DjE26tU0AY7OZL.jpg>

5) What kind of transparency does the President want?

He has [all] the info on secret government programs, criminal activities of other governments, secret societies, big pharma, the global banking system, Hollywood elites & more.

#Qanon's mission is to reveal that information.

World stalemate.

We all have the goods on everyone else.

That's part of the reason why some things that tie back to foreign heads of state will remain classified (not all).

We are in one of the most critical times of our country. Trump and others are working to balance the we're doing well for America (for the common person to endorse) while at the same time purify our govt and remove the bad actors who are entrenched. There is so much string pulling and blackmail that we need to cut these off to truly gain the power granted to us by the Patriots and hard working people of this great country.

<https://pbs.twimg.com/media/DjEDzYJVAAAYVSZ.jpg>

6) Obviously, we can't be given everything the President knows.
He wants us to have information that can safely be revealed.

[#Qanon](#) provides us with information that has been cleared for public dissemination.

Not everything can be publicly disclosed because so much ties back to foreign heads of state. Much will be revealed, we want transparency but not at a cost we can't recover from.

<https://pbs.twimg.com/media/DjEGEyKU0AE07Va.jpg>

7) Some things can't be revealed.
At least not now.

Partly for national security reasons & partly because the truth is so completely different from what we've been told, people would either not believe it or riot when they realize how much we've been lied to.

Some things must remain classified to the very end. NK is not being run by Kim, he's an actor in the play. Who is the director? The truth would sound so outrageous most Americans would riot, revolt, reject, etc. The pedo networks are being dismantled. The child abductions for satanic rituals (ie Haiti and other 3rd world countries) are paused (not terminated until players in custody). We pray every single day for God's guidance and direction as we are truly up against pure evil.

8) [#Qanon](#) said this operation is backed by military intelligence. Think about the outstanding characteristic of the military. They're mission-oriented. They don't quit until their mission is complete.

Military Intelligence.
No media.
No leaks.
How many MI generals have been in/out of WH in the past 30 days?
Focus on Flynn.
Background and potential role.
What is the common denominator in terms of military backgrounds close to POTUS?

9) The military backing of the operation leads me to believe that [#Qanon](#) will continue posting crumbs, hints, prayers, and words of encouragement until we have ALL the information the President wants us to have.

POTUS has it all.
He wants to have it all.

Our Oath of Office A Solemn Promise

By Jonathan L. Rudd, J.D.

Early in the morning, on their first full day at the FBI Academy, 50 new-agent trainees, dressed in conservative suits and more than a little anxious about their new careers, stand as instructed by the assistant director of the FBI and raise their right hands. In unison, the trainees repeat the following words as they are sworn in as employees of the federal government:

I [name] do solemnly swear (or affirm) that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely, without any mental reservation or purpose of evasion; and that I will well and faithfully discharge the duties of the office on which I am about to enter. — That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn that mankind are more disposed to suffer, while evils are sufferable than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security. —

CrowdStrike Closes \$100 Million Series D Financing Round

The go-to company to stop breaches exceeds \$1 billion in valuation; validates AI cloud-based endpoint protection as the new standard for endpoint security

Irvine, CA – May 17, 2017 – CrowdStrike® Inc., the leader in cloud-delivered next-generation endpoint protection, today announced that the company has completed a \$100 million Series D financing round, led by existing investor Accel. Other CrowdStrike investors CapitalG (formerly Google Capital) and Warburg Pincus are also participating in this round, along with new investor March Capital Partners and Telstra, a CrowdStrike customer. Following the closing of this round, the company's total funding raised is \$256 million with a valuation of over \$1 billion dollars.

Trump's 'Missing DNC Server' Is Neither Missing Nor a Server

The president can spout conspiracy theories all he wants. But the DNC turned over all its key data to the FBI after it got hacked. And that info wasn't stored on a single server.

<https://www.thedailybeast.com/trumps-missing-dnc-server-is-neither-missing-nor-a-server>

the computer's hardware, provide the evidence.

Both the DNC and the security firm CrowdStrike, hired to respond to the breach, have said repeatedly over the years that they gave the FBI a copy of all the DNC images back in 2016. The DNC reiterated that Monday in a statement to the Daily Beast.

"The FBI was given images of servers, forensic copies, as well as a host of other forensic information we collected from our systems," said Adrienne Watson, the DNC's deputy communications director. "We were in close contact and worked cooperatively with the FBI and were always responsive to their requests. Any suggestion that they were denied access to what they wanted for their investigation is completely incorrect."

The FBI declined comment for this story, but in testimony before the House Intelligence Committee last year, then-director James Comey said that CrowdStrike "ultimately shared with us their forensics."

At that same hearing, Comey complained that the DNC didn't give the FBI direct access to the DNC's servers. It's unclear why Comey wanted the FBI operating on the DNC's live network, but if the DNC demurred it wouldn't be an unusual call, particularly five months before election day.

<https://pbs.twimg.com/media/DjlvRNpUUAfCcr.jpg>

Crowdstrike said they gave the FBI the data they collected so claims that the Bureau was denied access are incorrect.

No one disputes that the FBI got a report from CrowdStrike.

The problem is that the FBI never received or examined the server; which is a violation of standard investigative procedure.

UMBAGE

The CIA's hand crafted hacking techniques pose a problem for the agency. Each technique it has created forms a "fingerprint" that can be used by forensic investigators to attribute multiple different attacks to the same entity.

This is analogous to finding the same distinctive knife wound on multiple separate murder victims. The unique wounding style creates suspicion that a single murderer is responsible. As soon one murder in the set is solved then the other murders also find likely attribution.

The CIA's [Remote Devices Branch's UMBAGE group](#) collects and maintains a [substantial library](#) of attack techniques 'stolen' from malware produced in other states including the Russian Federation.

With UMBAGE and related projects the CIA cannot only increase its total number of attack types but also misdirect attribution by leaving behind the "fingerprints" of the groups that the attack techniques were stolen from.

UMBAGE components cover keyloggers, password collection, webcam capture, data destruction, persistence, privilege escalation, stealth, anti-virus (PSP) avoidance and survey techniques.

The CIA has a library of software stolen from other nations.

Umbrage enables them to hack a system and leave digital "fingerprints" implicating another nation.

This means the CIA could have hacked the DNC server and "framed" Russia for it.

79) I'd like to finish with Wikileaks Vault 7.

The C_{IA} found vulnerabilities in iPhone and Android software that could enable them to interfere with the President's Twitter account.

[#Qanon](#)

"Year Zero" documents show that the CIA breached the Obama administration's commitments. Many of the vulnerabilities used in the CIA's cyber arsenal are pervasive and some may already have been found by rival intelligence agencies or cyber criminals.

As an example, specific CIA malware revealed in "Year Zero" is able to penetrate, infest and control both the Android phone and iPhone software that runs or has run presidential Twitter accounts. The CIA attacks this software by using undisclosed security vulnerabilities ("zero days") possessed by the CIA but if the CIA can hack these phones then so can everyone else who has obtained or discovered the vulnerability. As long as the CIA keeps these vulnerabilities concealed from Apple and Google (who make the phones) they will not be fixed, and the phones will remain hackable.

The same vulnerabilities exist for the population at large, including the U.S. Cabinet, Congress, top CEOs, system administrators, security officers and engineers. By hiding these security flaws from manufacturers like Apple and Google the CIA ensures that it can hack everyone &mdsh; at the expense of leaving everyone hackable.

81) The C_IA also found a way to bypass the encryption of messaging programs like Telegram, WhatsApp and Signal.

[#Qanon](#)

The CIA's Mobile Devices Branch (MDB) developed numerous attacks to remotely hack and control popular smart phones. Infected phones can be instructed to send the CIA the user's geolocation, audio and text communications as well as covertly activate the phone's camera and microphone.

Despite iPhone's minority share (14.5%) of the global smart phone market in 2016, a specialized unit in the CIA's Mobile Development Branch produces malware to infest, control and exfiltrate data from iPhones and other Apple products running iOS, such as iPads. CIA's arsenal includes numerous local and remote "zero days" developed by CIA or obtained from GCHQ, NSA, FBI or purchased from cyber arms contractors such as Baitshop. The disproportionate focus on iOS may be explained by the popularity of the iPhone among social, political, diplomatic and business elites.

A similar unit targets Google's Android which is used to run the majority of the world's smart phones (~85%) including Samsung, HTC and Sony. 1.15 billion Android powered phones were sold last year. "Year Zero" shows that as of 2016 the CIA had 24 "weaponized" Android "zero days" which it has developed itself and obtained from GCHQ, NSA and cyber arms contractors.

These techniques permit the CIA to bypass the encryption of WhatsApp, Signal, Telegram, Wiebo, Confide and Cloackman by hacking the "smart" phones that they run on and collecting audio and message traffic before encryption is applied.

<https://pbs.twimg.com/media/DjJDW4bU4AAHkfi.jpg>

82) Wikileaks reports the C_IA was "looking into" ways to interfere with vehicle control systems.
#Qanon

The attack against Samsung smart TVs was developed in cooperation with the United Kingdom's MI6/ISS. After infestation, Weeping Angel places the target TV in a 'Fake-Off' mode, so that the owner falsely believes the TV is off when it is on. In 'Fake-Off' mode the TV operates as a bug, recording conversations in the room and sending them over the Internet to a covert CIA server.

As of October 2014 the CIA was also looking at infecting the vehicle control systems used by modern cars and trucks. The purpose of such control is not specified, but it would permit the CIA to engage in nearly undetectable assassinations.

132) There's a lot of speculation on the board about what exactly happened and why [#Qanon](#) brought it up again. Q indicated it was brought up for a specific reason.

I would assume we'll hear more about it soon. (I don't know that it's helpful to speculate at this point in time.)
