CLOSEOUT → BASELINE DRIVE → ATTACK AGAIN

Nebraska vs Minnesota | Clip ID: ADV-072 | CONTINUE

1 DRIVE DRAWS TWO

The first drive attacks the gap and draws two defenders, forcing the defense to collapse.

2 LONG CLOSEOUT → BASELINE

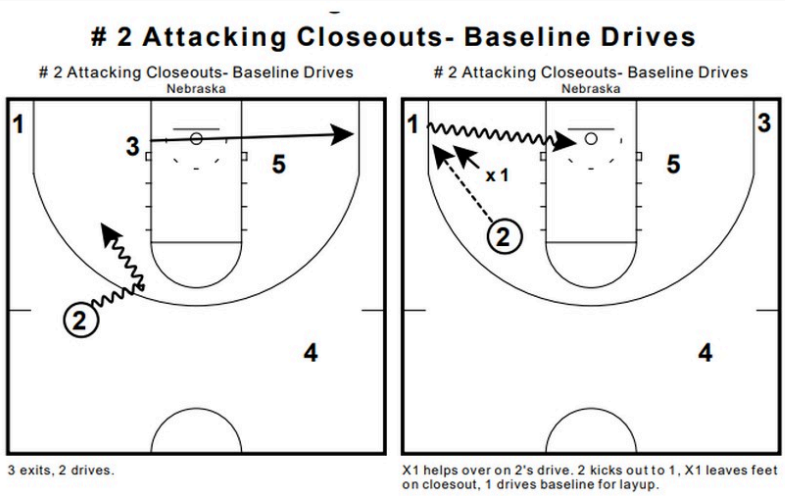

The kick-out creates a long closeout. The shot fake gets the defender up, and the guard attacks baseline.

3 BASELINE DRIVE → LAYUP

The guard gets downhill along the baseline and finishes the advantage with an open layup.

PLAY DIAGRAM — LOCKED FASTDRAW ASSET

TEACHING POINTS

1. Attack the first gap hard enough to draw help.
2. Kick the ball out and force a long recovery closeout.
3. Read the defender's feet and balance on the closeout.
4. Use the shot fake to get the defender out of position.
5. Attack baseline immediately before the defense can reload.

ADVANTAGE CREATED

Long Closeout / Defender Off Balance

Result: Baseline Drive → Open Layup

KEY TEACHING CUE

“Drive. Kick.
Attack the next closeout.”

WHY IT WORKS

The first paint touch shifts the defense. The kick-out forces a long closeout, and the shot fake makes the defender leave his feet. Instead of resetting, Nebraska attacks the next advantage immediately.

PRACTICE LAB IDEA

Drive-Kick-Closeout Game

- Start with a live gap drive.
- Force help, then kick out.
- Closeout defender must recover live.
- Read middle vs baseline.
- Continue the advantage to the rim.
