

# U.S. Navy Tails

by

ROGER CHENARD

This article will be the start of a "mini-series" detailing the many letter codes that the U.S. Navy has used, and is using, on the F-4 Phantom. Since 1961 there has been many Phantoms, using many combinations of letters and with this series, we hope to sort it all out.

The series will consist of eight sets of four pages. With this first series you will find a list of Naval carriers and the VF units that operated from them. You will also find a chart listing the various tail codes, the VF unit assigned that code,

and the units nickname. The third page you will find contains a color legend that will help you understand the drawings that are to follow.

If you should happen to find any errors in this series, please contact the author, Roger Chenard, 1st Maximin, Rue E. Herriot, Encagnane, 13090 AIX en PROVENCE, France. To make the series a little more interesting, we will try to include a number of photos with each article. Should you have any photos that you would like to see published, feel free to send them to the EDITOR. All such material will be returned after publication.

ABOVE: F-4J of VF-31 landing at NAF Warminster, Pa. Aircraft was home based at NAS Oceana. Sept. 1968. Photo taken from a Picciani Aircraft Slide.

BELOW: Carrier U.S.S. America, please note A-4s and F-4s on deck. Post card by Rowe Distributing.

ABOVE: F-4J of VF-84 also shot landing at NAF Warminster, Pa. Photo from Picciani A/C Slides. BELOW: Carrier U.S.S. Nimitz. Note Marine F-4s on deck of carrier. Post Card by Atlantic Fleet Sales, Norfolk, Va.

# U.S. Navy Tails

by

ROGER CHENARD

This is part Two of a series detailing the many letter codes that the U.S. Navy has used, and is using, on the F-4 Phantom. Since 1961 there has been many Phantom, using many combinations of letters and numbers, and with this series we hope to sort it all out.

To keep track of what we are doing it will be necessary for you to refer to pages 17, 18 and 19 that appeared in the previous issue of "Smoke Trails."

The author would like to make several corrections to the first part of this article that appeared in the last issue. On page 17, the code letters for CV 60 Saratoga should read AA instead of AC. On page 18, AD VF-171 sheet number 6 should be added and sheet number 8 deleted. On page 20, in lower left corner, add Bureau No. 5890 in the parenthesis of F-4J (203) (200) VF-74. Also add Bureau No. 157309 of F-4J (104)

VF-74. On page 22 modify Bu. No. of F-4J (201) 20 years upper right to read 153777 instead of 153771. On page 24 modify VF of F-4S (211) lower right from VF-175 to VF-171 and add Bu No. 153908. Finally, on page 27 complete the Bu No. of F-4A, upper right, to read 145307 and to modify the color code letters on the tail from 9-1 to 3-1.

If you should happen to find any errors in the current section, please contact the author, Roger Chenard, 1st Maximin, Rue E. Herriot, Encagnane, 13090 AIX en Provence, France. To make the series a little more interesting, we will try to include a number of photos with each article. Should you have any photos that you would like to see published, feel free to send them to the EDITOR. All such material will be returned after publication.

ABOVE: F-4Js of VF-121 fly formation during training exercise. The "J" was the sixth model of the Phantom to reach production. The "J" was also the model flown by the Blue Angels, the U. S. Navy Flight Demonstration Squadron. McDonnell Douglas photo.

# U.S. Navy Tails

by

ROGER CHENARD

This is part Three of a series detailing the many letter codes that the U.S. Navy has used, and is using, on the F-4 Phantom. Since 1961 there has been many Phantoms, using many combinations of letters and numbers, and with this series we hope to sort it all out.

To keep track of what we are doing it will be necessary for you to refer to pages 17, 18 and 19 of the first issue of SMOKE TRAILS.

Additional update material from the author includes the following. On page 18, Vol. I, No. 1 add to Code NK VF-21 page 21.

Roger will continue this series for several more issues. If you have slides/photos of any tail code that we don't cover in this series, it would help considerably if you would send a copy to Roger so he can add it in later. All help will be greatly appreciated. Mr. Chenard is working on a Marine series at this time. If you have any "older" Marine F-4 slides/photos please send a copy to Roger so it may be included.
