

VITOconnect

filter effectively, monitor smart

**Maximum
cost control and
seamless
documentation
made easy**

VITO oil filter systems clean your frying oil, save up to 50% of your frying oil costs, ensure optimal product quality and reduce the workload around your fryer, all at the same time.

Featuring the innovative technology VITOconnect you are now able to connect the filtration system to your local Wi-Fi, bringing your kitchen into a new era. The filtration system will send usage data into our web-based cloud. Register your VITO and start monitoring smart. Kitchen operators can remotely access detailed information about VITO usage from their smartphone, tablet or computer anywhere at anytime. The software enables to document time stamps of the filtration cycles, generate custom usage reports, set target filtration cycle goals, enable automatic email notifications and create custom alerts if filtration cycle target was not met.

Stay on top of your oil management to reduce running costs and improve operating procedures for a fast payback time while increasing oil quality. Through the adjustment of the VITO to the individual needs, the effectiveness and efficiency in everyday kitchen life can be increased.

VITOconnect

filter effectively, monitor smart

SOP control

VITOconnect guarantees the compliance with SOPs

Reporting

Monitor VITO performance remotely and get custom reports sent via email

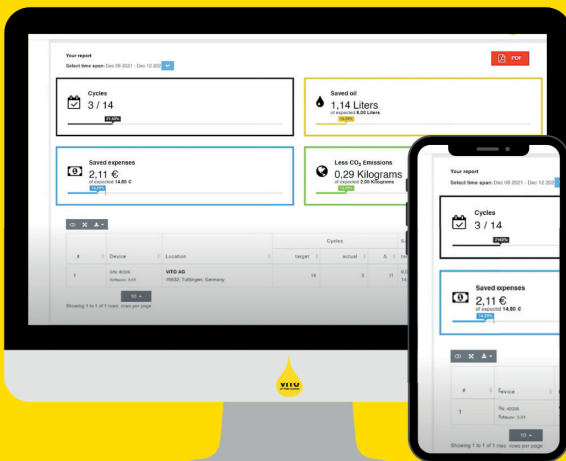

Investment protection

Seamless documentation of VITO usage ensures optimal cost control and its return on investment
