PACIFIC

ATLAS PACIFIC ENGINEERING

Your partner to the core.

When you join forces with Atlas Pacific, you don't just get the global leader in fruit processing solutions. You get a partner that's here today and here tomorrow.

ATLAS™ PACIFIC

The global leader, any way you slice it.

Since 1946, Atlas Pacific has been the world leader of deciduous fruit processing equipment. We offer the industry a range of machinery that enables our customers to produce the highest quality product while achieving unmatched operating efficiencies and cost savings.

Setting the curve on engineering innovation
Leading the competition for over 70 years.

Committed to cultivating true partnerships
Our customer care sets the industry standard.

Expert knowledge with a personal touch
From remote support to on-the-ground assistance.

Wherever you're going, we're already there
Supporting 3,500 machines in over 23 countries.

Process consultation, from seed to fruition
Our team will guide you every step of the way.

Our vision and values.

Our **mission** is yours. So everything we do revolves around your vision.

To bring you the best solutions in the industry, we believe that **innovation** is our most important investment.

Efficiency is key. We are committed to maximizing yields and saving our customers money.

The right **expertise** makes all the difference. So we put only the most qualified in the industry on your team.

You're at the core of everything we do.

We build more than just machines. We build relationships. Through every promise we make, through every solution we provide, our priority is you.

Global expertise for a world of services.

Our global staff of service and sales professionals are ready to assist you with everything from process optimization and consulting to equipment, maintenance and full-scale support for all seasonal and year-round operations. Our breadth of services include:

On-the-ground assistance and support
Wherever you are, we're there to lend a helping hand.

Process optimization
Efficiency isn't just a detail. It's a major priority.

Process consultation
Here to make sure the tiny moving parts fit your big picture.

Year-round spare parts
Whatever you need to stay up and running ahead of schedule.

Operational expertise
Got questions? We have over 70 years' worth of answers.

Full-scale support for seasonal operations
From the tree to the grocery shelf, we have you covered.

More fruit.
Less labor.

Slicing? Peeling? Capping? For whatever your fruit processing needs may be, Atlas Pacific offers a full line of equipment to get you there faster and with higher yield — all backed by the reliable support that comes standard with every solution we build. Because we're engineered to support you.

Operate with higher efficiency.

Innovation keeps our process fresh.

Atlas Pacific has been a leader in the apple industry since 1967, when we introduced our first peeling and coring machine. Since then, we've not only relentlessly improved the machine to maximize yield and quality, but we've also responded to demand for fresh-sliced product by creating the innovative Atlas Pacific Fresh Slice Apple System.

Apple Peeling Machine

Feed, orient, core and peel at speeds up to 130 apples per minute. Engineered to produce the highest yield possible using Sensor Peel technology, each peeler can be configured to produce wedge slices, ring slices or whole peeled apples.

Going beyond apples to apples.

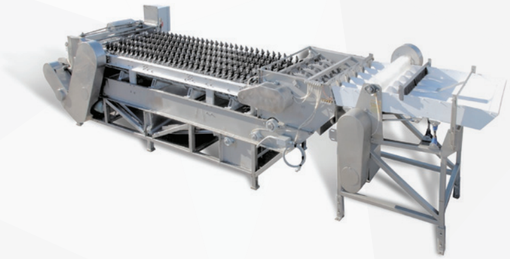
Fresh Slice Apple System

Stay ahead of rising demand with our Fresh Slice Apple System, capable of processing up to 115 apples per minute. Built out of 100% non-corrosive materials, the system integrates our base peeler with a specially designed slicer, giving you the versatility to do more.

Solutions for stems, caps, halves and pits.

Apricot Pitter and Halver

Flexibility and efficiency in one complete machine. The Atlas Pacific Pitter and Halver orients, slices and pits oval-shaped apricots at rates of up to 1,000 pieces of fruit per minute, and is adjustable to accommodate a wide range of fruit sizes.

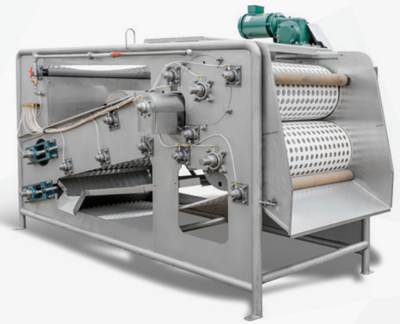


Strawberry Capper

What if you could maximize yield and produce quality berries by the slice? That's exactly what our Strawberry Capper (SC12) is built for. By making optimal cuts with unmatched efficiency, the SC12 delivers more product at faster rates, with increased profitability along the way.

Cherry Stemmer

Do more with less. Our Cherry Stemmer ensures the protection of fruit and removal of whole stems in a machine that operates with a minimum of parts, all of which are standard and exposed for ease of lubrication and maintenance.



Increased production and quality. What could be sweeter?

Atlas Pacific has been at the forefront of the peach industry since 1986, with the acquisition of the “Filper” brand pitter. Over the years, Atlas has worked to improve and customize the machine to maximize yield and product quality, leading to the innovative, second-generation Clean Peach Pitter.

Standard Peach Pitter

Excellence comes standard on our Peach Pitter, which processes up to 66 peaches per minute and is used primarily on clingstone peaches. This machine offers the best of both pitting methods — torque and spoon pitting — so you can achieve premium-quality fruit halves and higher case yields.

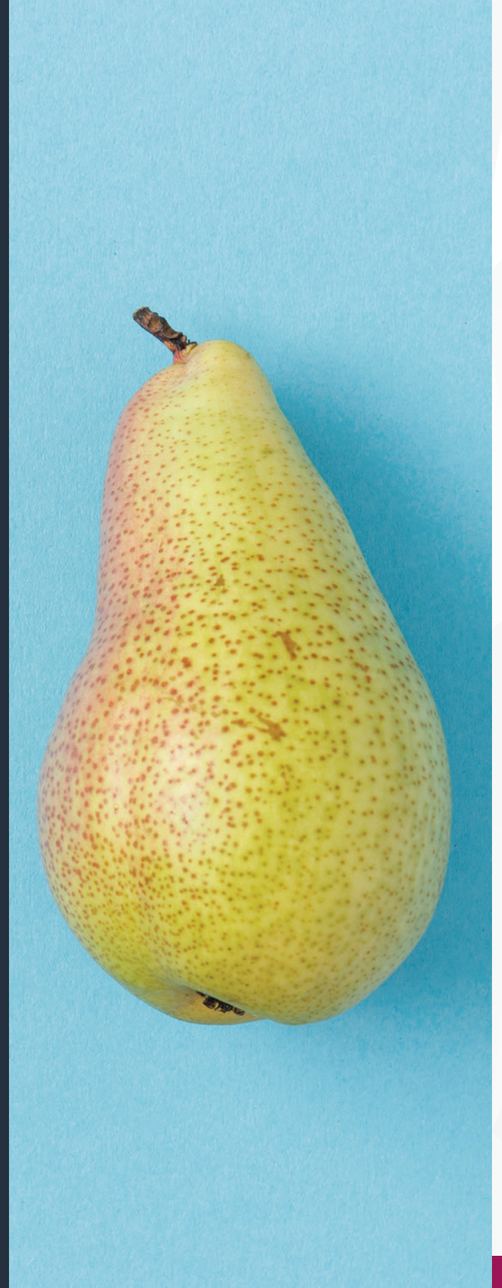
Eliminate pit fragments, not productivity.

Clean Peach Pitter

Get from branch to shelf faster with our Clean Peach Pitter (CP). Designed to handle cling and freestone peaches, the CP is a stainless steel, water-lubricated machine that operates at 91 peaches per minute — all while using Atlas’s patented Electronic Selective Pitting technology.

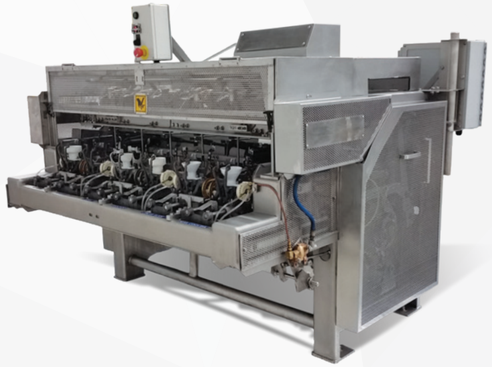
We never forget our roots.

The Standard Pear Peeler is the founding product line of Atlas Pacific, and it has become the industry standard since its introduction in 1946. Over the years, Atlas has worked to improve and customize the machine to maximize yield and product quality, leading to the innovative High-Speed Automatic Pear Peeler.

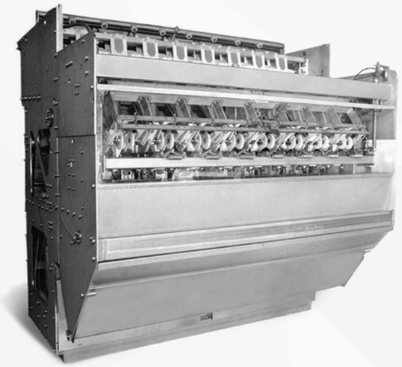


Standard Pear Peeler

An industry standard in mechanically peeling pears, the Atlas Pacific Standard Pear Peeler can process up to 66 pears per minute. With slight modifications, the machine can also peel kiwis, apples, mangoes and other fruits. Who says you can't teach an old machine new tricks?



Peel with efficiency.



High-Speed Automatic Pear Peeler

Operate at the intersection of output and efficiency with the High-Speed Automatic Pear Peeler. Our eight-lane machine nearly doubles the processing rate of its predecessor (124 pears per minute), while taking up less floor space than competitors, saving further on factory floor space requirements.

We don’t just process fruit. We exceed expectations.

The human advantage.

Seventy years of engineering expertise make Atlas Pacific’s equipment second to none. But it’s our customer service that elevates your production to new levels. When it comes to problem-solving and support, our team goes above and beyond the low-hanging fruit to power your operation to greatness.

Part of something bigger.

Our parent company, Gulftech, owns and operates a number of food processing leaders across the globe. From leaders in labeling solutions to pioneers in food science, Gulftech can connect you with a network of far-reaching resources to power potential beyond your primary needs.
